whistle: There's a

There's a couple of things that are good about middle age

No one expects you to be all that

But you still bring it on behind the bat

You've learned a few lessons, and learned them well

You've got a few tricks in which you excel

Your insight has been very good to you

You dispense advice, but don't tell em' what to do

You see the beginning, and you see the end

You've got an opinion, but you're willing to bend

And that's what's good about middle age,

There's still a few acts left on the stage

BRIDGE

There's a couple of things that are good about growing old

You've been a few places, you've read a few books,

You're not too concerned about your looks

There's a whole lot of knowledge stored in your brain

Although trying to retrieve it, is often a strain

You've got a piggy bank full of common sense

You state your opinion and don't straddle the fence

And though this list is gettin' long

You mostly get it right and rarely get it wrong,

And that's what's good about growing old,

It's all about the wisdom, from what I'm told.
